Stanley Nelavala

Application Development Engineer: Internal Tools, Integrations and Automation

218-213-8220 | consultantstanleymn@gmail.com | LinkedIn | GitHub | stanley-n.com
Huntington, IN | Open to relocate anywhere

Summary

Software engineer with an M.S. in Computer Science (4.0 GPA) and a year at Mass Technologies, a 10-person startup, where I build the RxApps360 hospital platform: FastAPI and PostgreSQL services, React and TypeScript web apps, a React Native mobile app, and the signed API every module calls. I build, support and document business applications: a design service and a mobile app used by hospital staff, a signed API between modules, automated server schedules, and public projects in Java and Spring Boot, TypeScript and Next.js, and a dbt data pipeline. I use Claude Code, Codex and opencode every day. AWS Certified Solutions Architect, Associate.

Experience

Software Development Engineer Nov 2025 – Present
Mass Technologies, team of 10 (RxApps360 hospital platform, pre-launch; numbers from dev and test) *Huntington, IN*

- Built RxDesign, the hospital design service (FastAPI, React, TypeScript), with a deterministic, rule-based layout engine and an LLM setting; 220+ offline API tests run with fake models, so tests never call an LLM.
- Built the RxAsset iOS and Android app (React Native, Expo) with scan-to-search and an on-device voice assistant (speech runs on the phone, no cloud call); set up release pipelines in GitHub Actions with automatic TestFlight submission.
- Designed, built and integrated into every platform module the signed service-to-service API (M2M): each call proves which service and tenant sent it. After a security audit, hardened it with a Redis rate limiter and replay protection.
- Replaced offset paging with keyset paging on the catalog device list: row 150,000 of a 328,000-device dev database fell from 285 ms to 0.20 ms, with no skipped or repeated rows (tested with inserts, deletes and ties).
- Automated weekday start and stop of dev and acceptance servers and databases (ECS, RDS): about 53 hours a week instead of 168.
- Standardized malware scanning of file uploads (GuardDuty) across 9 app modules.
- Use Claude Code, Codex and opencode every day to design, write, debug and review code; tests and written acceptance checks gate every change.

Adjunct Faculty (part-time) Jan 2026 – Aug 2026
The College of St. Scholastica *Duluth, MN*

- Taught Programming II (Java) and Machine Learning for Data Science.

Graduate Research Assistant and Teaching Assistant Aug 2023 – Aug 2025
University of Minnesota Duluth *Duluth, MN*

- Built a pipeline (Python, Node.js, MySQL, FFmpeg, PaddleOCR, BERTopic) that analyzed 1M+ TikTok videos from 300k+ authors for thesis research on misinformation.

AI projects (public code, tests)

Customer Integration Console | *TypeScript, Next.js, Fastify, PostgreSQL, OIDC* GitHub

- Internal console with single sign-on (OIDC) in front of a Fastify and PostgreSQL API; image scanned with Trivy.

Payments Ledger Service | *Java, Spring Boot, PostgreSQL, React, TypeScript* GitHub

- Double-entry ledger with idempotency keys and an outbox; property tests and a load check that no money is created or lost.

FHIR Analytics Pipeline | *Python, Airflow, dbt, DuckDB, HL7 FHIR R4* GitHub

- Health-data pipeline with dbt model contracts, a quarantine gate, k-anonymity (k=5), HIPAA-style control mapping and 108 tests.

Skills

Role focus: internal tools, integrations, workflow automation, documentation and support
AI-assisted coding: Claude Code and subagents, Codex, opencode, a DeepSeek harness; planner, manager and worker runs with acceptance checks
Application development: Java, Spring Boot, Python, FastAPI, TypeScript, React, Next.js, React Native (Expo), REST, OIDC, signed service-to-service APIs
Data: SQL, PostgreSQL, Redis, dbt, Airflow, keyset paging
Cloud and quality: AWS (ECS, RDS, S3), Docker, GitHub Actions, Linux, JUnit, pytest, Playwright, runbooks and documentation

Education and Certification

M.S. Computer Science, University of Minnesota Duluth, 2023 – 2025, GPA 4.0, Graduate Summer Research Fellowship 2024 and 2025
B.Tech Computer Science and Engineering, IIIT D&M Kancheepuram, 2019 – 2023
AWS Certified Solutions Architect, Associate, Feb 2025 – Feb 2028 (verifiable on Credly)
