Stanley Nelavala

Applied AI Engineer: Enterprise Agents, Evals and Healthcare Software

218-213-8220 | consultantstanleymn@gmail.com | LinkedIn | GitHub | stanley-n.com
Huntington, IN | Open to relocate anywhere

Summary

Software engineer with an M.S. in Computer Science (4.0 GPA) and a year at Mass Technologies, a 10-person startup, where I build the RxApps360 hospital platform: FastAPI and PostgreSQL services, React and TypeScript web apps, a React Native mobile app, and the signed API every module calls. I work close to users and ship: a hospital design service with a deterministic layout engine and an LLM setting, a mobile app with an on-device voice assistant, and public LangGraph and MCP agent projects with human approval, guardrails and 62 replay evals. I use Claude Code, Codex and opencode every day. AWS Certified Solutions Architect, Associate.

Experience

Software Development Engineer Nov 2025 – Present
Mass Technologies, team of 10 (RxApps360 hospital platform, pre-launch; numbers from dev and test) *Huntington, IN*

- Built RxDesign, the hospital design service (FastAPI, React, TypeScript), with a deterministic, rule-based layout engine and an LLM setting; 220+ offline API tests run with fake models, so tests never call an LLM.
- Designed, built and integrated into every platform module the signed service-to-service API (M2M): each call proves which service and tenant sent it. After a security audit, hardened it with a Redis rate limiter and replay protection.
- Built the RxAsset iOS and Android app (React Native, Expo) with scan-to-search and an on-device voice assistant (speech runs on the phone, no cloud call); set up release pipelines in GitHub Actions with automatic TestFlight submission.
- Automated weekday start and stop of dev and acceptance servers and databases (ECS, RDS): about 53 hours a week instead of 168.
- Replaced offset paging with keyset paging on the catalog device list: row 150,000 of a 328,000-device dev database fell from 285 ms to 0.20 ms, with no skipped or repeated rows (tested with inserts, deletes and ties).
- Standardized malware scanning of file uploads (GuardDuty) across 9 app modules.
- Use Claude Code, Codex and opencode every day to design, write, debug and review code; tests and written acceptance checks gate every change.

Adjunct Faculty (part-time) Jan 2026 – Aug 2026
The College of St. Scholastica *Duluth, MN*

- Taught Programming II (Java) and Machine Learning for Data Science.

Graduate Research Assistant and Teaching Assistant Aug 2023 – Aug 2025
University of Minnesota Duluth *Duluth, MN*

- Built a pipeline (Python, Node.js, MySQL, FFmpeg, PaddleOCR, BERTopic) that analyzed 1M+ TikTok videos from 300k+ authors for thesis research on misinformation.

AI projects (public code, tests)

Agent Integration Platform | *Python, FastAPI, LangGraph, MCP, PostgreSQL (pgvector), Redis* GitHub

- Multi-step agent with typed state, one constrained MCP write tool, human approval that resumes after restart, and step and token budgets; hybrid retrieval with access labels.
- 62 deterministic replay evals, prompt-injection tests, output guardrails, PII redaction, an append-only audit log; failover between two LLM adapters with a circuit breaker.

Customer Integration Console | *TypeScript, Next.js, Fastify, PostgreSQL, OIDC* GitHub

- Internal console with single sign-on (OIDC) in front of a Fastify and PostgreSQL API; image scanned with Trivy.

Agent-fleet build workflow | *Claude Code, opencode, DeepSeek, shell* GitHub

- A planner, manager and worker agent pipeline that delivered two public services and an ops console in 34 work packets, each with written acceptance checks and a progress log.

Skills

Role focus: enterprise AI delivery, agents with guardrails and evals, healthcare data (FHIR), customer-facing engineering
AI-assisted coding: Claude Code and subagents, Codex, opencode, a DeepSeek harness; planner, manager and worker runs with acceptance checks
Customer-facing AI: LangGraph, MCP tools, tool use, retrieval (pgvector), human-approval flows, guardrails, prompt-injection tests, PII redaction, audit logs, LLM failover
Languages: Python, TypeScript, JavaScript, SQL, Go, Rust, Java
Integration and web: FastAPI, React, Next.js, Node.js, PostgreSQL, REST, OIDC, signed service-to-service APIs, webhooks
Cloud and quality: AWS (ECS, RDS, S3), Docker, GitHub Actions, pytest, Playwright

Education and Certification

M.S. Computer Science, University of Minnesota Duluth, 2023 – 2025, GPA 4.0, Graduate Summer Research Fellowship 2024 and 2025
B.Tech Computer Science and Engineering, IIIT D&M Kancheepuram, 2019 – 2023
AWS Certified Solutions Architect, Associate, Feb 2025 – Feb 2028 (verifiable on Credly)
